

Elephant Profile

ANDILE

Andile is a beautiful young female elephant with a healthy appetite that is impressive - even for an African Elephant!

All elephants like to eat large quantities of food; Elephant Whispers is proud to provide a home to the Olympic Gold Medal Winner in this category. Most appropriately named Andile, which in Zulu means to increase, to multiply and spread, she, much to our amusement, exceeded all expectations in this regard!

Andile is a pretty elephant with elegant long eyelashes and a lovely sweet demeanour to match her attractive looks. Andile has very sensitive eyes, her nictitating membrane works hard to keep her eyes moist and clean which results in a white foam often forming at the corner of her eye. When this foam turns into liquid, it runs down the creases around her eye and looks like tears.

Andile AT A GLANCE

Sex: Female

Age: 22 Years

Shoulder Height: 2.63m

Approximate Weight: ±1.9 tons

Andile is a quick learner and enjoys learning new tasks happily showing these off, in return of course, for tasty treats. She is a very sociable elephant, she often seeks out the company of her human caregivers.

We can be sure that wherever Tembo is, he will be closely shadowed by Andile who absolutely adores him. Andile, being a very smart young lady who likes things to go her own way, seeks Tembo's company for back-up when her big personality causes a few ructions in the herd!

As the most recent addition to the herd, Andile quickly settled and became a special member of the Elephant Whispers family. We all look forward to the day she discovers that she, like other elephant, can rumble, a privilege we look forward to hearing.
